HMIS

What Is HMIS?

The Homeless Management Information System (HMIS) is a web-based information system. Organizations that serve homeless and at-risk individuals in the Greater Los Angeles and Orange counties need to compile information about the persons they serve.

Why Gather and Maintain Data?

HMIS will gather and maintain unduplicated statistics on a regional level to provide a more accurate picture of our region's homeless and at-risk population. HMIS will also help us understand client needs, help organizations plan appropriate resources for the clients they serve, inform public policy in an attempt to end homelessness, streamline and coordinate services and intake procedures to save client's valuable time, and so much more

Written Client Consent

Each client must complete a Client Consent to Share Information Agreement allowing release of demographic information to the HMIS. Clients will be required to complete a signed form to be kept on file with the service provider. A copy will be provided to the client.
